

WEEKLY REPORT
Air Division
Environmental Protection Agency
Region 9
Week Ending March 24, 2017

Significant Items for Last Week

Public Notice for a New Source Review Permit - Laguna Reservoir Restoration Project: On March 24, we issued a public notice for a proposed Minor New Source Review (NSR) permit in Indian Country for the Laguna Reservoir Restoration Project by the US Bureau of Reclamation (USBR). The permit would authorize the USBR to construct and operate a booster pump system at Laguna Reservoir on the Fort Yuma Quechan Reservation in Imperial County, CA. (Contact: Khoi Nguyen, 7-4120)

McElmo Creek Prevention of Significant Deterioration (PSD) Permit: On March 24, the Acting Division Director signed a Federal Register notice providing notice of the final PSD permit decision for the McElmo Creek Unit Oil Production facility. The facility consists of an oilfield and gas compression plant, and is located within the Four Corners area of the Navajo Nation. The McElmo Creek permit, with a response to adverse comments received during the public comment period, was issued by EPA on September 30. (Contact: Shaheerah Kelly: 7-4156)
